

# AI Visionaries Summit

# 2025

05 Dec, 2025

9:00am - 18:00pm

**The Place Gurugram**  
A member of Radisson Individuals,  
Sector 29, Gurugram, HR, India

More Information At  
[www.magnivelinternational.com](http://www.magnivelinternational.com)

# Agenda

Schedule for a AI Visionaries Summit

2025

9:00am - 10:00am

## Registration & Networking

Meet and mingle with attendees

10:00am - 10:10am

## Opening Remarks by Magnivel International

**Moderator:** Pankaj Malik, LPS Bossard Private Limited, India

10:10am - 11:10am

## Panel Discussion

Accelerating the future of AI and supercomputing

The demand for high-performance computing (HPC) is accelerating and at the heart of this surge is its growing synergy with artificial intelligence. This convergence is redefining computational

**Strategies:** accelerating AI model training, embedding AI more deeply into scientific and industrial workflows, and reshaping HPC system designs themselves. Across Asia, groundbreaking initiatives like AI Factories - powered by HPC supercomputing infrastructure - are leading the way in developing next-gen AI capabilities. As HPC and AI continue to align, their combined potential is unlocking new frontiers in research, innovation, and global problem-solving.

### Key Areas for Discussion:

- In what ways is AI integration streamlining HPC-driven research and simulations, and what role do AI Factories play in this evolution?
- What advances in hardware and software are making AI training faster and influencing the architecture of future HPC systems?
- How can organizations foster cross-disciplinary expertise in AI and HPC to drive innovation – and how does this align with Europe's strategic vision for a robust, competitive AI ecosystem?

# Agenda

Schedule for a AI Visionaries Summit

2025

**Speaker:** Vijeta Sharma, Scientist of HPC & Artificial Intelligence, Norwegian University of Science and Technology, Norway

**Speaker:** Sandeep Sharma, Head of Emerging Technologies - Network Services, Tech Mahindra, India

**Speaker:** Kirit Goyal, Director, Gazelle Information Technologies, India

**Speaker:** Sudin Baraokar, AI and Digital Transformation Advisor, India

**Moderator:** Pankaj Malik, Marketing specialist, LPS Bossard Private Limited, India

11:10am - 11:50am

## Oral Presentation

Minimizing Time to Insight with Advanced AI Inference  
**Ananya Sundar**, Associate Director Client, Neutrino Advisory, India

11:50am - 13:00pm

## Panel Discussion

Redefining AI: From Enterprise Threat to Strategic Asset

The influence of major technology companies on the S&P 500 has grown significantly, with the top five firms accounting for nearly 25% of its market cap in 2023. Much of this momentum is being driven by the surge in interest and investment in artificial intelligence. However, despite the buzz, there's still uncertainty around whether AI will truly deliver a widespread productivity boost across the broader economy. AI holds immense promise for generating value across industries. Yet, many businesses remain cautious.

In fact, around one in four U.S. companies have prohibited the use of generative AI tools altogether. Some organizations cite a lack of in-house expertise as a barrier, while others struggle with fragmented data systems or outdated infrastructure that complicates AI integration. To fully leverage AI, business leaders need to develop a deep understanding of the technology - and foster an organizational culture ready to adapt, innovate, and evolve. As AI continues to dominate headlines, a pressing question remains: can companies cut through the hype to build effective, people-focused AI strategies? What does AI adoption look like in real world business settings? And is there measurable evidence that it's driving productivity gains?

# Agenda

Schedule for a AI Visionaries Summit

2025

## Key Areas for Discussion:

**Strategic Use of AI:** How can companies deploy AI not just as a tool for automation, but as a catalyst for innovation and new business capabilities?

**Workforce Transformation:** With emerging roles like “prompt engineer” and “AI explainability specialist,” how is generative AI reshaping the landscape for white-collar professionals?

**Policy and Regulation:** What role should governments play in crafting AI liability and governance frameworks that promote safe, responsible, and forward-looking innovation?

**Reality vs. Hype:** With expectations for AI sky-high, how do we separate inflated promises from achievable outcomes? What does a realistic, grounded conversation around AI adoption look like?

**Resilience Beyond Big Tech:** If the current tech boom slows or reverses, how can companies continue to innovate and stay productive in an evolving technological and economic environment?

**Speaker:** Deependra Chokkasamudra, Business leader and mentor, Zvolv, India

**Speaker:** Tushar Sharma, Founder, Neuroplex, India

**Speaker:** Himanshu Jain, Engineering Director, Academian Inc, India

**Speaker:** Amey Pangarkar, Founder, aconsultancy.marketing, India

**Speaker:** Deb Gooha, Chief Growth Officer, Mobile MPay, India

**Moderator:** Pankaj Malik, Marketing specialist, LPS Bossard Private Limited, India

13:00pm - 14:00pm

**Networking lunch**

14:00pm - 14:30pm

**Oral Presentation**

FeelEd AI™: An Emotion-Adaptive Framework for Story-Based Cognitive Learning

**Velayutham S**, Founder and Lead Researcher, BeliefRecode AI, India

# Agenda

Schedule for a AI Visionaries Summit

**2025**

14:30pm - 15:00pm

**Speech**

Build Before you're Ready: How AI is Creating More Opportunities – My Journey from Zero to Shark Tank  
**Abhit Sinha**, Co-founder & Chief Tech Hustler, Orbo.ai, India

15:00pm - 15:30pm

**Oral Presentation**

Unblocking Data Flow: Enhancing AI Systems for Scalability, Compliance, and Cost-Efficiency

**Nidhi Gulati**, Country Communications Director, Springer Nature, India

15:30pm - 16:00pm

**Oral Presentation**

Agentic AI driven Smart, Autonomous & Intelligent Finance Automation

**Deependra Chokkasamudra**, Business leader & mentor, Zvolv, India

16:00pm - 16:30pm

**Oral Presentation**

Bigbasket's experience with integrating Generative AI in the customer shopping journey

**Saratnath Buddhiraju**, Chief Architect, Bigbasket, India

16:30pm - 18:00pm

**Closing Reflections and Coffee Networking**
